

Puss 'n' Boots Day Nursery **Sickness Policy**

Please follow the below procedures in the event of your child being unwell and unable to attend the Nursery. It is essential that we are aware of anything unusual about your child's health and well-being or if they do not seem themselves. It is of paramount importance to ensure that we consider all children's and staff's health at the Nursery. We therefore endeavour to keep the Nursery a happy and healthy environment for all within. This means we rely greatly on the judgement of parents bringing their children into Nursery, ensuring that they are not infectious and well enough to spend the day amongst their friends and teachers. It is also important that we are aware of any medication your child is receiving, or has been given prior to them coming into Nursery, this is in case of an emergency, in which we may have to give a medical professional as much information as possible.

1. Please contact the Nursery at your earliest convenience and let us know if your child is unwell, this is vital in the event your child has an infection which we may need to notify other parents of.
2. Please follow the guidelines below for the specified conditions and keep your child at home if he/she is infectious, as this will reduce the risk of cross infection amongst other children and the Nursery staff.
3. If in doubt, please do not hesitate to ask a member of staff.

The below guidelines are those provided by Puss 'n' Boots Management Team and the 'guidance on infection control in schools and other childcare settings 2017' Public Health England.

<u>ILLNESS</u>	<u>EXCLUSION PERIOD</u>
Bronchiolitis	Until FULLY recovered
Chicken Pox and Shingles	At least six days after the appearance of the last crop of spots, when they are fully crusted over and when the child feels well enough.
